DETAILED ACTION

Information Disclosure Statement

1. If applicant is aware of any relevant prior art, he/she requested to cite it on form PTO-1449 in accordance with the guidelines set forth in M.P.E.P. 609.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1,4 are rejected under 35 U.S.C. 102(e) as being anticipated by Wang et al. (6,446,249).

With regard to claim 1, Wang et al. discloses an I/O region formed on a chip 425 and having at least an input/output pad 435; a plurality of active region 505 formed on the chip 425; the active region 505 being separated from one another by a boundary spacer; a plurality of logic circuits having either one of the same functions and different functions being mounted in each of the active regions 505, and a selection circuit (Note fig. 14) for selectively operating only one of the plurality of mounted logic circuits. (Note figs. 1B, 10,11,14 of Wang et al.).

With regard to claim 4, Wang et al. discloses the selection circuit selects a logic circuit to be operated on a basis of a signal input supplied from an outside through the input/output pad 435. (Note figs. 1B, 10,11,14 of Wang et al.).

Allowable Subject Matter

3. Claims 2,3,5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 2,3,5 are allowable over the prior art of record, because none of these references disclose or can be combined to yield the claimed invention such as said selection circuit includes a disconnecting section, and said disconnecting section is disconnected to allow permanent setting of an operable circuit as recited in claim 2, and said selection circuit includes a transistor element connected in series with each said logic circuit and a power terminal, and said transistor element selects a logic circuit to be operated on the basis of a signal input supplied from the outside through said input/output pad as recited in claim 5.

Response to Amendment

4. Applicant's arguments with respect to claims 1, 4 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a). A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
